

14.08.14

Overlap extension PCR of
- rLuc-Hog1+Ura3 H6
PCR of
split sfGFPC+hog1 flanking sequence H5

Overlap extension PCR

25µL reaction

Template: 1µL (60ng) H1

1,7µL (100ng) H3

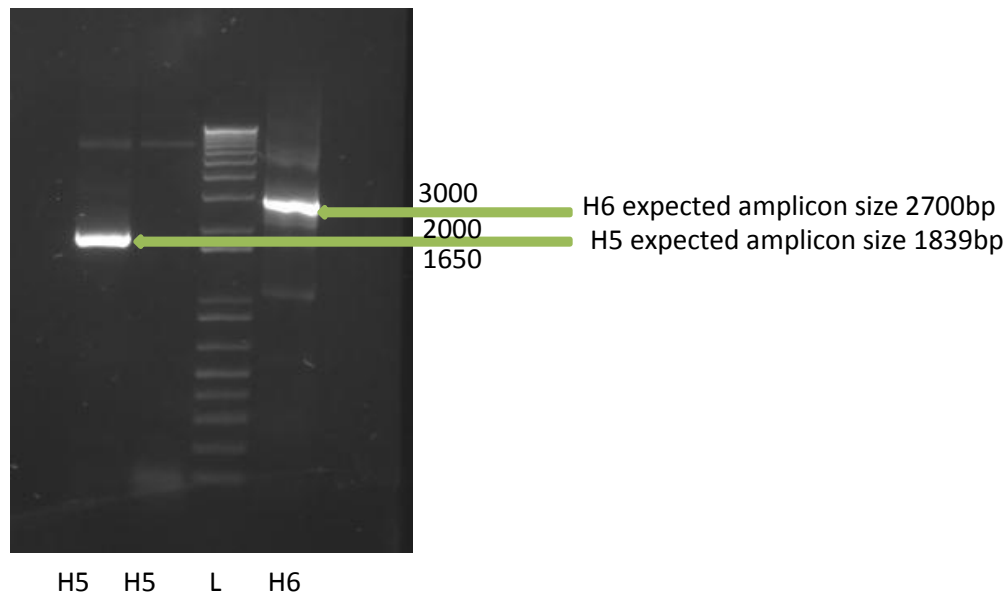

15 cycles with 62°C of annealing temperature

+15 cycles with 62°C of annealing temperature after addition of primers H7 and H1_rv

PCR H5

25µL reaction with good primers this time !

Results

Our first overlap PCR worked!!! 😊
